Logging Into Google At Home

To access your Google Suite at home, you need to sign into your Google account. You can sign into only Google from any web browser by going to www.google.com. If you are using Google Chrome as your home browser, you can choose to sign into Google Chrome, and this will sign you into your Google account, and will also give you access to your bookmarks and those accounts that you use at school that require you to be recognized as a PSD student.

To sign into Google from www.google.com:

- Go to www.google.com
- Click the waffle in the upper right corner
- Click account
- Click sign into account
- Follow the prompts to sign in, using your ID#@psdschools.org
- Use your PSD password

Once you’ve successfully signed in you’ll see your initial or your icon in the upper right corner. Now you can access your Google Docs or other Google suite items. Be sure to click your icon and SIGN OUT when you are done! If you don’t, everyone at home will have access to your Google Suite, and accidents can happen!

To sign into Google Chrome:

- Open Chrome
- Click the grey head in the circle in the far upper right corner
- Click “Sign Into Chrome”, or “Turn on Sync”, depending on your version of Chrome
- Follow the prompts using your full ID#@psdschools.org. These prompts differ based on your Chrome version; just answer the questions correctly.
- When given the choice, choose yes to “sync” and to “link”. This is what syncs your bookmarks and other data.

When you are done, unless you have created profiles for multiple users, be sure to sign back out of Chrome. To do this:

- Click your head icon, and click the “Other people” settings cog.
- Hover over your own icon, and you’ll see the 3 dots appear in the upper right corner of the icon box.
- Click them, and choose “Remove User”.

Remember that any changes or extensions that you add at home while signed in will show up at school the next time you log into your computer. Be careful not to add things that will interfere with our school resources!
